

ACTIVITY 3: Find my favorite things!

Hi! It's Hulu again. I'm a **Palila**, a finch-billed Hawaiian honeycreeper. We only live in Hawai'i.

Would you like to know a little more about me?

My favorite food: seeds from the *māmāne* tree. This plant has beautiful yellow flowers, is in the pea and bean family, and is only found in Hawaii (endemic to Hawaii).

Other foods I like: naio berries, caterpillars.

Where I live: on the upper slopes of Mauna Kea on Hawai'i Island. I like to live where the *māmāne* tree can be found. Unfortunately, there aren't so many of these trees left because the dryland forest got destroyed!

Some places where my family used to live: not only Mauna Kea, but also on Mauna Loa and Hualālai; my family used to live in an area 10X bigger than now!

Nesting materials: I used grasses, stems, roots, lichen and branch bark from the *māmāne* tree to build my nest. And usually I raise two eggs at a time.

My favorite place to visit: the Keauhou Bird Conservation Center Discovery Forest.

Check out the next page to see if you can find words about me.

Till next time, A hui hou!

Hulu

P.S. Watch your inbox. I'll see you again soon!
